

OpenVoice Audio Feature Comparison

When your business is spread around the world, you need convenient and affordable ways for you and your employees to communicate. Whether you need a standalone audio conferencing service or a toll-free addition to your GoToMeeting, GoToTraining or GoToWebinar web conferencing sessions, OpenVoice has an easy-to-use solution for you.

All services include:

- Coverage of 50+ countries
- Free recording and storage
- Outlook and Google integrations
- Mute/unmute
- Reservationless conferencing
- Online account management for administrator and organizers

Just need standalone audio conferencing?

We recommend our OpenVoice audio conferencing service. This reservationless audio service includes toll-based and toll-free options for conference calls with up to 500 participants.

- Provision users and generate reports in real time via our admin portal
- Start a call any time using a dedicated conference room and PIN
- Manage calls through the web controls' online interface or use your phone's keypad
- Record, store or download calls in MP3 format at no charge
- Avoid the cost of operator assistance by hosting the call yourself using the easy-to-use conferencing system

Need toll-free audio plus web conferencing?

OpenVoice Integrated audio service seamlessly adds a toll-free option to your GoToMeeting, GoToTraining or GoToWebinar sessions, which include VoIP and toll audio options. Adding this toll-free audio service to your account allows you to:

- Schedule web and audio conferencing in one step
- Manage an audio and web conferencing session from the same control panel
- Record audio and online content together in one click — no special equipment needed
- Increase attendance with a toll-free audio option
- Lower total audio costs by using toll-free along with VoIP and toll-based options on the same call
