Here for you – every step of the way
We take the pain out of change.

Introducing a new audio solution can be hard. We get it.
Whether you're looking for a standalone audio solution or looking to integrate a toll-free option into your existing GoToMeeting, GoToWebinar or GoToTraining account, the OpenVoice audio team is ready to help you get started quickly and easily. We're here to partner with you at each step – from setup to deployment to support, we're ready to help you drive rapid adoption with easy-to-use tools and a fully integrated audio, web and video experience.

**OpenVoice: Make it easy to join from anywhere, anytime.**
OpenVoice lets attendees choose the most convenient way to join a conference call with multiple options for dialing in. Whether they are sitting at their desk or taking a call from the road, they have the ability to choose the fastest way to connect.

Looking to add toll-free audio to your current GoToMeeting account? OpenVoice Integrated allows you to offer attendees extra audio options to join their meeting and have everyone heard (and recorded) on the same call. So, rather than connecting with their mic and speakers (VoIP) or incurring long-distance phone charges, attendees can call in toll-free. The organizer's account is charged a per-minute usage fee for each attendee who connects using toll-free audio.

Ready to introduce OpenVoice to your organization? Three quick steps is all it takes.

Easy configuration

Straightforward user setup

24/7 support

1. Setup: Consider your users
Before you get started, it's important to think about the users in your organization. This will help you define your user profiles and determine appropriate default settings for the collaboration tools you have access to. Once you've developed your user groups, you can then define the configuration settings for each group and modify them to fit your needs. Visit our **support page** for additional information and handy videos.
2. Deployment: Communication is key
Clear communication is essential for successfully deploying OpenVoice to your users. And email is still king for reaching users across your organization. When changing from another online provider, we provide you with key communication tools to ensure an easy transition and quick adoption.

3. Support: We're here to help
Our team is available 24/7 to help you resolve any issues that may arise. Your meetings are important, and audio issues can be difficult to troubleshoot on your own, so don't hesitate to let us know if you're having trouble. Our Customer Care representatives are standing by to help you with any audio quality issues you experience.
