

# BE SEEN, BE HEARD, BE REVOLUTIONARY

**Introducing the new GoToMeeting:  
Built by our users, for our users**

With an extensive series of updates to the product, GoToMeeting delivers a flawless experience from start to finish for both IT and end users. Shaped by thousands of customer conversations, the new GoToMeeting revolutionizes the way you communicate with features designed to save you time, so you can build stronger relationships and collaborate with ease.

We're by your side before, during, and after your meetings take place – modernizing workforce productivity that will prepare your organization for years to come.

## Pre-Meeting:

- **Meet the Hub.** Streamline your workday with a single interface containing all your meetings, complete with meeting information and diagnostics. You also have the ability to chat, schedule, and start or join meetings.
- **Flexible scheduling.** It's never been easier to choose between one-time or any-time meetings. Hosts can also create multiple personal meeting rooms with custom branding – perfect for internal or external audiences. (Or both!)
- **Even more plugins and integrations.** Add your favorite email plugin, or integrate GoToMeeting with several popular business tools like Salesforce, Zoho, Slack, and more.
- **Faster join times.** Joining a GoToMeeting is 65% faster than before, making it industry-leading and totally seamless! As an attendee, you can also choose how you join, whether it's through a download-free web meeting or our new desktop or mobile apps.

## In-Meeting:

- **Video-first design.** Make your meetings more personal, so you not only make connections, but build and nurture meaningful relationships with your colleagues.
- **\*Real-time note taking.** Recording a session? Take notes in real-time, identify highlights, mark action items, and share them after the meeting. \*Coming soon!
- **Crystal-clear audio.** Wideband VoIP capabilities are now available via PSTN. Additional audio enhancements keep GoToMeeting reliable, even if you find yourself in an extreme low-bandwidth situation.
- **Consistency.** No matter how you're joining a GoToMeeting, the experience should be the same across all devices. Now, it is!

**Faster than ever**

**Easy, intuitive  
user controls**

**Enhanced audio &  
reliability**

**Integrates with  
your favorite apps**

### Post-Meeting:

- **Unlimited cloud recording.** Never miss a moment! Meeting transcripts make content digestible in minutes, allowing hosts and attendees to spend less time note taking and more time participating.
- **Video to Slides.** Automatically capture presentation slides during meetings and share them in an easily-downloadable PDF.
- **View, download and share transcripts.** Ensure everyone is on the same page, even when sick days, vacation time and other conflicts get in the way.
- **Meeting diagnostics.** IT Administrators can view meeting diagnostics to monitor audio and video quality, enabling them to identify and troubleshoot root causes for meeting quality issues.

“ I love the ease of use. I love how easy it is to schedule and start a meeting. ”

Brian Cote  
Outbound Sales Manager, Boston
